This is IBM

Restlessly reinventing since 1911
We are a global technology and innovation company headquartered in Armonk, NY.

We are the largest technology employer in the world and employ 380,000 IBMers serving clients in 170 countries.

In 2016, we generated 79.9 billion revenue.

We invest more than $6 billion a year in R&D, and just completed our 25st year of patent leadership.

We live at the intersection of business and technology and today, we are a cognitive solutions and cloud platform company, transforming entire industries.
IBM’s next era is all about the power of cognitive solutions, Cloud platform, delivered to transform industries

+ Half of our footprint will be in cognitive solutions and software platforms business.
+ Our mix will continue to shift as it has for the past 100 years.
+ These new technologies are embedded into and enrich our base offerings – Power, z, storage,…
+ All is underpinned by IBM Security.

1. Cognitive
2. Cloud
3. Industry
Cognitive systems augment human intelligence, allowing faster and more informed decisions.

+ Watson is at the core of our cognitive technology
+ 1 billion customers has been reached by Watson in 2017
+ Watson solutions are being built, used and deployed in more than 45 countries and across 20 different industries
+ Watson is being trained in eight languages besides English.
Cloud is a catalyst for innovation, speed and new applications allowing enterprises to innovate instantly.

+ IBM is the leader in enterprise cloud
+ IBM operates 59 cloud data centers in 19 countries
+ More than 100 billion transactions a day on IBM systems
+ 160+ Bluemix cloud services across cognitive, IoT, Blockchain
+ 5,200+ cloud patents over the last five years, and 1,100 patents awarded in 2017
We have reinvented IBM for a new era – deep expertise to transform companies, industries and professions in a cognitive era.

+ 97% of the world’s largest banks use IBM products to run their systems
+ 80% of the world’s travel reservations are processed on IBM systems
+ 90% of global credit card transactions are processed on IBM mainframes
+ 80% of global retailers are powered by IBM retail solutions
+ 83% of the world’s largest communications service providers are IBM clients
We’re continuously investing in skills and innovation – restlessly reinventing to power a new era.

+ Each year we invest $500 million in professional development globally
+ IBMers spend an average of 60 hours a year on learning and training to become experts in their jobs.
+ We have 110 Agile studios globally and 165,000 IBMers trained in agile.
+ We use digital tools like WebEx, MURAL and Slack to drive innovation and collaboration.
+ We have contemporized nearly 7M square feet of agile and collaborative workspaces and focus on continuous renovation and modernization.
IBMers speak with a diverse voice, representing more than 170 countries.

We have a long history of diversity and inclusion and we have always been at the forefront of decisions in support of equal rights and progressive workplace policies. With more than 100 years of breakthrough, leadership workplace policies, we set ourselves apart in our long-standing and ongoing commitment to creating a workplace that is diverse, fair and inclusive.

From our founder to Ginni Rometty today, we believe that no one should face discrimination for being who they are.

"We are privileged to work for a company that’s had the opportunity to have an impact on history in so many ways."

#inclusiveIBM
We innovate and imagine the future, working with experts to put our clients first

With 3,000 researchers and scientists in 12 global labs on six continents, the world is our laboratory.

IBM Research is home to 6 Nobel Laureates, 10 US National Medals of Technology, 5 US National Medals of Science, 6 Turing Awards, and 10 Inductees in US Inventors Hall of Fame.

Every year, IBM recognizes its leaders in science, tech, design and business: the IBM Fellows.
We have a passion for corporate responsibility.

Our efforts span environmental responsibility, social responsibility to our IBMers, clients and partners; innovation to address critical societal needs in the communities in which we operate; and a culture of ethics and integrity that promotes transparency on a global basis.

Through our P-TECH program, created by IBM with leading educational partners, we are preparing ‘new collar workers’ for high-tech jobs.

Since 2008, 3000 IBMers in 275 teams have engaged in 40 countries in over 1000 projects helping communities facing critical challenges through our Corporate Service Corps.
So we continue to innovate and touch every aspect of modern life, even beyond the unexpected...
“We are fighting for the future -- your future. A future in which the world is healthier, less wasteful, more productive and personalized, more secure and more just.”

- Ginni Rometty
