Letter of Intent for PANDA (Antiproton Annihilations at Darmstadt)**.. We propose to study fundamental questions of hadron and nuclear physics in interactions of antiprotons with nucleons and nuclei, using the universal PANDA detector. Gluonic excitations and the physics of strange and charm quarks will be accessible with unprecedented accuracy thereby allowing high-precision tests of the strong interaction. The proposed PANDA detector is a state-of-the-art internal target detector at the HESR at GSI covering almost the full solid angle. .
