

UNIVERSITÀ DEGLI STUDI DI PAVIA  
DOTTORATO DI RICERCA IN FISICA  
Call for applications

## **Indications for reference letters:**

Reference letters are uploaded by the people indicated by the candidate. The candidate has to enter the system, complete the section on file upload (documents, titles...) and insert the names of max two references. When the candidate completes the application, the system sends an email to the two references, with instructions on how to upload the letter. Since the reference letters must be uploaded before the application deadline, **candidates are advised to start the procedure well in advance.**

Once the application is completed, the candidate can, before the application deadline:

- modify the data previously entered, the modifications will be permanently saved provided that the candidate bring the full application again to a conclusion;
- add, cancel or modify the documents uploaded;
- add, cancel or modify the data of the chosen referee/s, and possibly send a reminder to the referee/s already inserted.

The modifications will be permanently saved provided that the candidate bring the full application again to a conclusion.

After the deadline for applications, modification or addition to the data or to the documents will be no longer possible
